

Active Directory Domain Services (AD DS) Components

AD DS Structural Components:

Objectives:

At the end of this episode, I will be able to:

1. Identify and explain AD DS forests, trees, domains, and trusts..

Key Points:

What is a forest?

What is a domain?

What is a trust?

What are some AD DS trust types?

What is a site?

Explain the site components of a site link: site link name and cost.

Explain how subnets relate to sites.

Explain bridgehead servers and how they participate in inter-site replication.

What is the difference between intra-site and inter-site replication?
