

# On-Premises and Hybrid IP Addressing

## Create and Manage IP Reservations

### Objectives:

At the end of this episode, I will be able to:

1. Create and manage IP reservations.

### Key Points:

What is the purpose of a DHCP reservation?

List and discuss the steps for creating a DHCP reservation.

What TCP/IP configuration component must you provide to ensure that the IP address is assigned to the correct device?

Which overrides the other: Exclusions or Reservations?
