

Hyper-V and Guest Virtual Machines

Manage VM Checkpoints

Objectives:

At the end of this episode, I will be able to:

1. Manage VM checkpoints.

Key Points:

What are VM checkpoints?

Explain the creation of the differencing disk and the status of the original virtual hard drive at checkpoint creation.

Why should you carefully manage checkpoints?

Which tool is used to create VM checkpoints?

Explain the difference between a standard checkpoint and production checkpoint.

Discuss the usage of the Checkpoint-VM Powershell cmdlet.
