Home Screen

Application

Step-by-Step Instructions

Bypass the Home Screen

- Open Photoshop Elements 2024. You should see the Home Screen. If you see the application, then you do not need to follow this video.
- On the Home Screen, click on the Photo Editor icon. You should now see two PSE icons open in your application bar: one for the Home Screen and one for the Editor.
- Activate the Home Screen and close it (Ctrl/Cmd Q).
- Pin the application (Adobe Photoshop Elements Editor) to your application bar, or save it to your desktop.
