There are many ways to work the material in this minicourse, so explore the PDF and video then dive in when you're ready.

The main goal of this course is to introduce you to the different elements of playing jazz guitar, presented over a ii V I progression.

These elements include:

4. Chromatic Chords
5. Major Scales
6. Chromatic Ornaments
7. Mixing Chords and Scales
8. And more.

Here's a quick layout of how to work the material in this mini course and how I recommend working it in your studies.

2. Go back to the beginning and re-watch the first chapter.
3. Work on chapter 1 in the PDF until it's comfortable.
4. Move on and watch the chapter 2 video.
