Michael Yeh, MD, PhD

Welcome to Behind the Knife Premium Surgical Oncology Oral Board Audio Review. We are thrilled you have chosen Behind the Knife to help you prepare; we have the utmost confidence that our review material will have you ready to DOMINATE the exam.

This oral board review course includes 46 scenarios that meticulously cover all of the SCORE CGSO topics on the Surgical Oncology Oral Board Exam. Each scenario includes two parts. Part A is a perfectly executed oral board scenario that mimics the real thing. Scenarios are 5 to 7 minutes long and include a variety of tactics and styles. If you are able to achieve this level of performance in your preparation you are sure to pass the oral exam with flying colors. Part B introduces high-yield commentary to each scenario. This commentary includes tips and tricks to help you dominate the most challenging scenarios in addition to practical, easy-to-understand teaching that covers the most confusing topics we face as surgical oncology surgeons. We are confident you will find this unique, dual format approach a highly effective way to prepare for the test.

This course came about due to a lack of a cost-effective, high-value board prep course for all those planning on taking the Surgical Oncology Certifying Exam. The material you will be provided was created, edited, and curated for trainees by Surgical Oncology Surgeons.

Don't forget to check out www.behindtheknife.org for more high-yield surgical education content. You can also sign up for our newsletter, register for free CME, and even purchase some merch. For regular updates, follow us on Twitter @behindtheknife and Instagram @behindtheknifepodcast.

As with all Behind the Knife content, the information included in this course is for educational purposes only.

	✓	Case Name	Author	SCORE CGSO Category
0	<input type="checkbox"/>	Introduction		
1	<input type="checkbox"/>	Ductal Carcinoma In Situ	Michael Alvarado, MD	Breast
2	<input type="checkbox"/>	Early Invasive Breast Cancer	Michael Alvarado, MD	Breast
3	<input type="checkbox"/>	Locally Advanced Breast Cancer	Michael Alvarado, MD	Breast
