Perfectly Personal Word Art
Hexagon Homework Part 2

[TOU](#)

In many ways, part two of the homework is the whole reason for this class! This is the payoff where you get to just have fun customizing your very own word art templates.

As we just talked about, it's time to practice customizing your hexagon templates. Not only that, but it's a great idea for you to take some time to create a digital project like a scrapbook page or card where you use these customized templates.

Let's recap the homework guidelines:

#1. Use at least two of the hexagon templates we just made in your project.

#2. Use any of the four templates you wish.

#3. And, if it's been awhile since you watched the Customization Rules lesson from the Paper Strips section of this class, it's a good idea to go back and watch it. The same rules apply for any of the paper piece word art templates we've made.

Now that we've covered the homework guidelines, let's take a quick peek at the two hexagon templates I chose to use and how I chose to customize them.

As you can see, I chose to customize the two hexagon templates that had a more color block design to them. I felt they complimented each other well. I made good design choices by using solid background papers, an easy to read font, and contrasting colors that make the words very easy to read.

Here is the scrapbook page I made using my two customized hexagon templates. I strategically placed both templates next to the two photos on my layout. They really help draw the eye to the photos and help tell the story the page is visually trying to tell. I repeated the hexagon theme throughout the layout because I wanted this to have a very fun and vibrant feel to it. The moment I saw these photos, I cracked up laughing and I knew I had to make a scrapbook page that was more fun and less serious to go with them.

Now it's your turn! It's time for you to practice using your hexagon templates in a project. But don't stress. You don't have to create a scrapbook page like I did where I used hexagon shapes all over the place. Hexagon word art looks great with simple rectangles, too! So, do what you're most comfortable with and most of all, enjoy the process!
