

# POWERTEX UNIVERSAL MEDIUM

THE MUST-HAVE MEDIUM FOR EVERY ARTIST

Powertex Universal Art Medium can be used for Fiber Art, sculpting, painting, and all your mixed media.

## Product Tips

Powertex Universal Art Medium is a textile hardener as well as binder and strong adhesive. Powertex carries the API Safety Certification

Always stir and shake the bottle before use (use a skewer or dowel to stir in the bottle). Clean the bottle and lid before replacing them and close tightly (consider using plastic between bottle and lid)

Do not allow Powertex Universal Medium to freeze in bottles. Powertex is weatherproof when cured.

Protect work surfaces and clothing. Powertex Medium is permanent once dry.

Powertex works best with natural materials; cotton, cardstock, canvas, MDF, wood, metal, cork. It can be used with polystyrene and glass.

## ...Product Tips continued

You can dilute with a little water, but do not add too much.

Experiment with 3D Flex and Stone Art to create air dry clay

Powertex will be dry to the touch in about 3 hours. Drying time depends on the thickness of the application, humidity, and temperature. Allow a minimum of two weeks project to 'cure' before varnishing to put outside.

Dry brush with pigment/varnish mixture in layers to bring out texture, or dry brush with acrylic paints

Mix Powertex Universal Medium colors to achieve your custom colors. You can also mix Powertex Pigments with Universal Medium to achieve custom colors
