

# Recreate Historical Swordsmanship from Historical Sources

## “Find a Source That’s Right For You” Homework

1. Find three primary sources for each of the following options:

- English language between 1550 and 1650
- Includes sword and buckler
- In English or Spanish, in period for the Three Musketeers
- In German or Italian, includes smallsword

2. List your own interests regarding a source; this could include period, or culture, or specific weaponry. Be honest with yourself. Then find at least one source that meets those needs, and is in a language you can read, or is available in translation.

3. Find an original source in a language you don’t know well, and a translation of it, and go through the translation to find at least one question that requires you to look up the original work.

4. List your own interests regarding a source; this could include period, or culture, or specific weaponry. Be honest with yourself. Then find at least one source that meets those needs, and is in a language you can read, or is available in translation. This is the source you will work from for the rest of this course, so be careful in your choice.

5. Search for additional resources that may assist with teaching this material (e.g. Books, Google, Youtube etc). Create a table of these resources including a brief description of how they may help.
