PRINCIPLES

by Lisa Agaran

1

Give yourself permission to make it imperfect.

6

Be courageous. Follow curiosity versus fear. The more hesitant you feel the more you should go for it.

2

Don't over think it, listen to your creative intuition and allow yourself to PLAY.

7

You don't always have to know where your piece is going, just trust the creative process, keep creating.

3

Creating isn't always smooth sailing. Frustration, doubt and struggle is a natural part of the Creative Process. Hang in there!

8

Know when your piece doesn't want to go any further and take a break from it. You can always finish later.

4

Get messy and experiment don't be afraid to be spontaneous.

9

Welcome accidents and mistakes to occur, that is when creative magic happens.

5

If there is something you're not happy with, you can always peel it off, collage or paint over what you've already done.

10

Find beauty in imperfection. Try not to judge and instead always give your artwork some LOVE.
