

## Perfectly Personal Word Art Triangle Homework Part 2 – Transcript

©2019 Jenifer Juris

Now that we've made a number of triangle templates, it's time to practice using them in a project. Part two of the homework is simple and contains two parts. One, you need to practice customizing them and two, you need to use those customized templates in a project.

Now let's go over the guidelines for this homework. The first guideline is to use at least two of the triangle templates in a project. Second, use any of the four triangle templates that you wish. And third, remember to revisit the customization rules from section one of this class. The rules for customizing a paper strip are the exact same as they are for triangles.

Now let's take a look at the triangle templates I decided to use and how I customized them. As you can see, I used coordinating colors and just a touch of pattern. I also made sure to use a matching font on both. Here's the scrapbook page I made using my two customized templates. I used my two triangles to help tell my story and I also placed them so that they would point towards the main photo. This draws the eye to the photo while also providing context as to what is happening and when.

Now it's your turn. It's time for you to create something using triangles. It could be a card, a scrapbook page, a photo collage or anything in between. Once you've finished this, it's time to move on to part three of the homework. I'll see you there. This is Jenifer Juris with perfectly personal word art.
