

Story of the Bible: Leadership Orientation

This document gives guidelines and helpful instructions to who is leading this session of Grow

Grow: Daily Walk

Goals:

The goal of this class is to make the Bible less confusing and more fruitful to read. We will be tracing through the story of the Bible from beginning to end, touching on historical points, giving context for each book of the Bible and helping people see the big picture of the whole book.

Things to keep in mind:

- In this session it would be very important for people to bring a Bible and a Journal to each class session. If possible bring some to lend out for the class for those that need it.
 - A lot of the discussion times will include reading some of the bible and discussing it.
- The ministry times(Try It Out) will often be structured around issues that come up as we move through the story of the Bible. We will break up into groups each session and pray for each other about specific issues the topics bring up.
- The Talk about it(or discussions) will primarily be focused interacting with scriptures brought up in the teachings
 - Recommend smaller groups of 4-6 people
- The Bring it Home(Homework) portion will include a lot of scripture reading outside of the session meetings. The readings will be about the content that was just covered. There are two levels of amount for the reading. A smaller and a larger reading.
 - We will provide a PDF of what the Bring it Home is to Email your group if you are interested.
